

## **Great Basin Type 3 IMT Rotation Guidelines**

1. Application of the out of GACC rotation will be determined per this document, which will be posted on the GBCC website.
2. The IC or Oversight Representative will notify GBCC of IMT availability and the desired area of availability (Local, State, GACC, National).
3. GBCC will manage the roster for all standing teams and all orders will be filled at the GACC level.
4. For any orders for an incident within GACC, the closest forces policy will apply. For incidents outside the GACC, the rotation will determine the appropriate resource.
5. If a team is unavailable or committed to an incident within the GACC, GBCC will move to the next state/team on the list. The unavailable/committed team will maintain position on the out of GACC rotation.
6. When an order is received, GBCC will contact the team's Oversight Representative (on annual certification) prior to assignment to ensure that the team is available for mobilization.
7. Team(s) returning from out of GACC assignments, regardless of the length or nature of assignment, the state will be placed last on the rotation, ensuring other teams/states have an opportunity for mobilization.
8. GBCC Center Manager, GMAC Coordinator, NMAC and/or Great Basin Coordinating Group Chair retain decision space to deviate from the rotation given certain conditions and/or factors and may choose not to commit all T3 teams and pause the out of GACC rotation.
9. Out of GACC rotation will be updated by GBCC and will be posted on the GBCC webpage.
